

BK267 Adapter Converts a Woodward Dyna 8000 Series to GAC 225 Series Actuator

Replacing a Woodward Dyna 8000 Series actuator with a GAC 225 Series is simplified with this adapter. The original mounting kit can still be used as the shaft of the 225 series actuator will be in the exact same position as the old Woodward unit. The adapter lets you mount a 225 in either direction to replace a CW or CCW rotation 8000 series actuators.

Additional 225 Series Actuator System Components Include:

- **Speed Controllers:**
EEG6500, ESD2210, ESD5500E, ESD5500-II, ESD5111, ESD5550,
- **Actuator Mating Connectors:**
Packard - EC1300, Military - EC1000 (straight) & EC1010 (90 degree)
- **Actuator Mating Harness:**
6' Packard – CH1215, 12' Military - CH1203 (Straight) / CH1210 (90 degree)

	Torque		Shaft Rotation	Nominal Steady State Current - 12V	Nominal Steady State Current - 24V
	Ft-Lbs	Nm			
GAC: 225 Series	2.2	2.7	25°	3.0 Amps	1.5 Amps
Dyna 8000 Series	1	1.4	35°	3.5 Amps	1.5 Amps
