GAC WELCOMES DIRECTOR OF ENGINEERING AND INNOVATION

Rose Brings Over 15 Years of Product Development & Innovation Experience

August 21, 2018, Agawam, MA - Governors America Corporation (GAC) welcomes Michael Rose as Director of Engineering and Innovation. Michael brings over 15 years of product development and innovation experience within the Aerospace Industry. In this role, he will lead the engineering department and work closely with the technical and marketing executives to broaden the company's portfolio and develop innovative products for the engine control and adjacent markets.

GAC's president, Dr. Sean Collins stated "I am delighted that Michael has decided to join our team here at GAC. His multiple accomplishments and wide-ranging experience will assist our entire organization garner new levels of success!"

Michael brings a unique blend of business acumen, broad technical knowledge and facilitation practices that stem from his years of experience in the roles of Engineer, Business Development Manager and Project Leader at L3 Technologies and MIT Lincoln Laboratories. His addition to the team demonstrates the company focus on innovation, continuous improvement and engineering execution.

Governors America Corp. (GAC) is a leading provider of engine governing and system controls to a worldwide list of equipment manufacturers and power providers. From isochronous governors and fuel controls to sophisticated multi-engine load sharing/power control systems, GAC has innovative solutions to meet and exceed all of your needs. GAC also provides practical solutions for custom applications with complete design,

development, production and marketing capabilities. Manufactured in the USA, GAC products are sold and supported by GAC's established worldwide network of representatives and distributors.
