

PCI105

50 to 60 Hz Frequency Switching Module

1 INTRODUCTION

The PCI105 module provides the ability to switch from 50 to 60 Hz generator frequency when combined with any ESD5100, ESD5200 or ESD5500 series controller. It features two potentiometers to independently adjust each speed / frequency and is powered by the 10 volt output from the controller's terminal "P". The switch is popular with rental fleets serving domestic and international markets and has been assigned:

- Deutz part number 1509-8057
- Scania part number 1359 216
