## ABOUT THIS GUIDE

This guide details the cross-reference list of GAC products that either directly replace or can replace existing governing equipment.

**NOTE: DIRECT ONE-FOR-ONE REPLACEMENT PARTS ARE IDENTIFIED.**

This guide provides direct one-for-one replacement parts with GAC part numbers that could replace or repair existing equipment. These cross references are recommendations based on the most common application and may not always be direct solutions for your application. Always contact [GAC](#) to confirm the selection based on the exact application/installation. Direct replacements, usually OEM items, are noted with a checkmark.

Call the GAC application engineers for assistance if your installation or engine is not shown or you are unsure of the part number you are replacing.

Details on each GAC part number is available on the [GAC website](#).

**CONTACT GAC at 1-413-233-1888**

The information in this guide is provided only as a convenience. GAC is not responsible for any incorrect, inaccurate, or incomplete information.

You are solely responsible for (1) selecting the appropriate products for your application, (2) validating and testing your application, and (3) ensuring your application meets applicable standards and any other requirements including but not limited to safety and security.
